

## **PRESS RELEASE!!**

### **Mobile DJ Network introduces "DJ Webmin" to the world of Mobile Disc Jockeys as the best booking administration to date**

**MINNEAPOLIS, MINNESOTA.** -- December 4, 2001 -- Mobile DJ Network announced today the official launch of DJ Webmin Disc Jockey Booking Administration web-ware to the public.

"We are very excited to have finally reached this day. DJ Webmin has been a need for a very long time with our local mobile dj service and others around the country. We've tested and probed for months to create a rock solid and complete booking solution. This solution will allow the mobile disc jockey industry to control their booking and dj administration from virtually anywhere they have internet access." said Barry Cedergren, DJ Webmin founder and lead developer.

DJ Webmin is the first product of Mobile DJ Network, a nation wide disc jockey promotion company dedicated to the mobile music industry. The launch of the DJ Webmin Booking Administration web-ware (web based software lingo) promises a completely new revolution to this industry. With the launch of DJ Webmin comes a promising new standard in DJ booking administration because of it's complexity, ease of use and total mobility. There is nothing available on the market that can complete with what it features and the solution it provides to time consuming booking/dj administration. "The release of DJ Webmin will allow the Mobile DJ industry to concentrate more on the time consuming things...music, system repairs, marketing, not booking administration." Cedergren went on to say. The offering of a free trial membership, completely private company control and unlimited system administration is guaranteed to make the market jump toward it.

Opportunities open for mobile dj vendors with DJ Webmin's launch. Banner advertising will be available to vendors who have legitimate products to offer members. Inquiries to advertise can be directed to Barry Cedergren at (763) 862-5721 or email [barry@djwebmin.com](mailto:barry@djwebmin.com).

DJ Webmin is offering press release recipient s the ability to review DJ Webmin and all the features it offers with a full version membership account.
